Data Center Cleaning Services

Are you particular about who enters your data center?

Most companies are.

Anderson Business Products (ABP) now offers a computer facility cleaning service, which addresses this concern while providing superior data center cleanliness.

Typical sub-floor cleaning

Professional, periodic maintenance in computer rooms reduces the risk of equipment failure and the resulting loss of data availability. ABP uses high filtration HEPA vacuums, low moisture cleaning processes, specially designed chemicals, and crews that are trained in the proper handling and management of cables and security systems in these critical areas.

Services Provided

- Interstitial Space Cleaning
- Sub-floor Plenum HEPA Vacuuming
- ESD Floor Maintenance
- Reconditioning of Raised Floor Tile
- Equipment Housing Cleaning
- Sub-floor Sealing
- General Room Cleaning
- Zinc Whisker Remediation
- Mechanical and Electrical Room Cleaning

Service Benefits

- Reduced Risk of Catastrophic Failures
- Increased Life and Performance of Raised Floor
- Reduced Risk of Diminished Equipment
- Improved Facility Appearance
- Reduced Risk of Down Time During Cleaning
- Increased Employee Morale
