Equipment View

Comprehensive.

Whether you have a single location or multiple locations around the globe, Environet lets you monitor all your mission critical components from anywhere. Using Environet's drill-down capabilities, you can track statuses of an enterprise, drill into an individual facility, or view a single point of information all within the same application.

Customizable.

Environet graphically details your mission critical environment, from an entire building complex to the smallest component within it. Graphics, calculations, sequences, and more can all be customized to fit your facility. Pick from Environet's feature list and build a system that meets your unique needs.

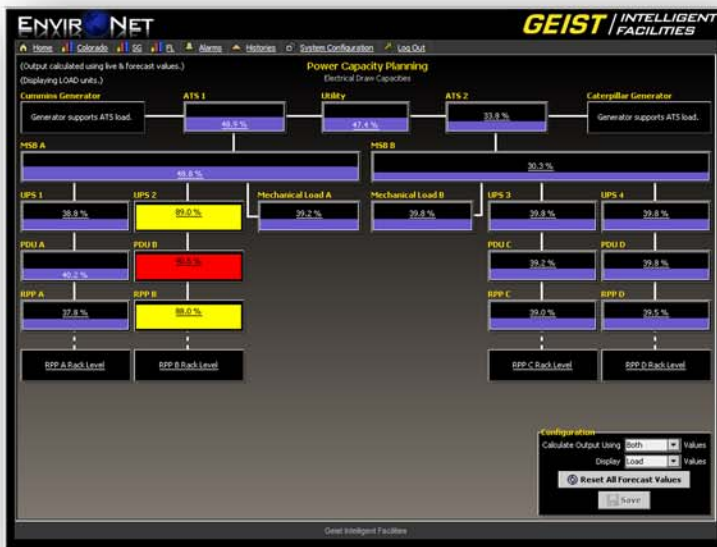

“ There's a lot of flexibility in the product's ability to store data, warn, and alarm. These features allow us to perform trend analysis and be proactive rather than reactive in monitoring growth. ”

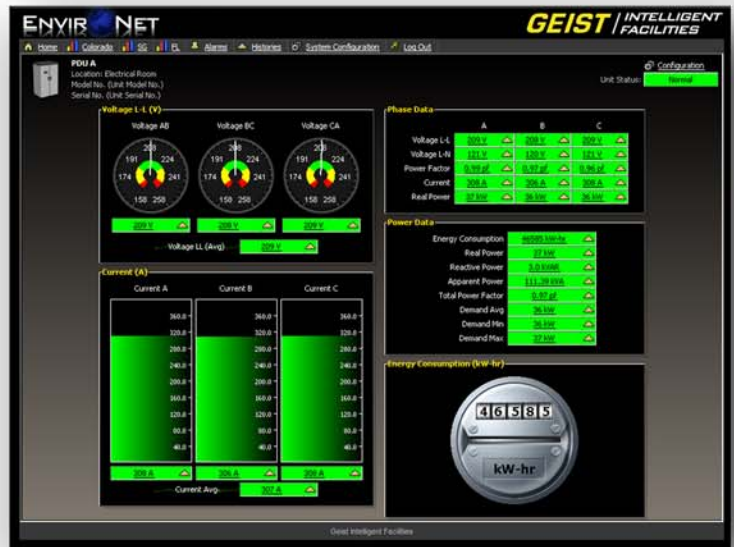

– Director of Data Center Operations

“ The sales and support staff have been excellent to work with over the past few years. They have a good understanding of our business, and they have been able to work with us to find technical solutions to meet our needs. ”

– V.P. Technical Operations

PDU View

Cohesive.

Environet integrates with numerous communication protocols allowing the system to work efficiently with existing equipment. Support for a wide variety of manufacturers makes it easy to integrate with your facility.

Cost Effective.

Environet's flexible design expedites installations, lowers costs, and minimizes maintenance. With Environet at work, you can identify potential issues that can result in lost revenue and clients.
